Graduation

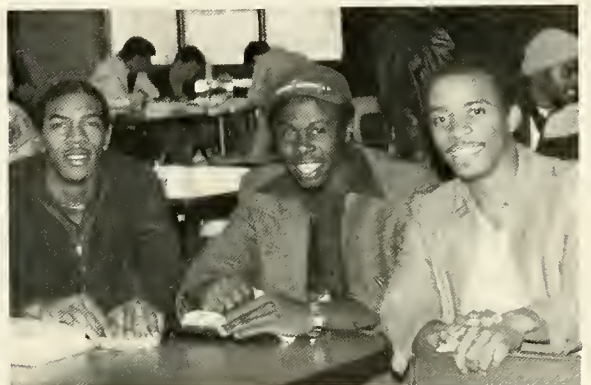

The 1982 "Valiant" is dedicated to a man who has been a part of RTC since it began. A man who always gives his all and is still willing to go an extra mile for the school and the students. He is usually seen walking the halls and looking in classrooms to make certain everything is okay. He always carries a word of encouragement, a good joke or a word of wisdom for those he encounters. We love him dearly, MR. RALPH HARRIS!

Teacher of the Year

Audrey H. Moore

We the staff of this year's VALIANT have chosen Mrs. Audrey H. Moore as "Teacher of the Year" for her outstanding contribution to the growth and improvement of our student body.

It has been said, a teacher affects eternity; he can never tell where his influence stops. Mrs. Moore may we never lose the enthusiasm of learning you have shared with us.

Part-Time Teacher of the Year

John Wester

This year the VALIANT staff would like to feature something new. A new spotlight on a certain group of individuals who haven't been recognized in the VALIANT'S past, the Part-Time Faculty.

We, the VALIANT staff, have named Mr. John Wester as "Part-Time Teacher of the Year" for all his support and encouragement towards the students of Richmond Technical College.

Pardon me, did you say, "Learning to teach, or teaching to learn?"

General Education

In General Education, one can take humanities, science, art and business courses from college instructors. After three quarters, you have a choice—you may either obtain an Associate Degree in three more quarters at RTC or you may transfer to Pembroke State University for further study toward a Bachelor's Degree in the major of your choice.

Electrical Installation and Maintenance

Look around you! How many new homes, stores, and manufacturing plants do you see under construction? Every one of these buildings requires electrical wiring as well as maintenance and additions after the initial installations. That's what Electrical Installation and Maintenance is all about—a good trade in a field where the demand is great for the individual who can deliver the goods.

Industrial Maintenance

In Industrial Maintenance, one learns to install, maintain and repair electrical and mechanical equipment used by industry. To do this, one will learn about blueprints, operating metal-working machines, and how to test electrical components, etc. When one has completed the curriculum, he is ready to be an electromechanical serviceman—which means that he can find a good job in industrial maintenance.

Air Conditioning Heating Refrigeration

The air conditioning, heating, and refrigeration mechanic is a skilled worker who installs, maintains, services, and repairs environmental control systems in residences, department and food stores, office buildings, industry, restaurants, and commercial establishments. The graduate should be able to assist in installing mechanical equipment, ductwork, and electrical controls necessary in residential and commercial projects. With experience the graduate should be able to service various air conditioning, heating and refrigeration components, troubleshoot systems, and provide preventive maintenance required of mechanical equipment.

“Nothin’ could be finer...”

And nothing could be truer than that familiar song. LOF should know. We’ve been producing glass and increasing our glassmaking facilities in North Carolina since 1972.

Our recently expanded Laurinburg float glass plant is the newest in the nation. Now Laurinburg has two float glass furnaces so we can simultaneously supply many of the specialized types of glass our customers now require.

While at our Clinton Thermopane® plant, we’ve more than doubled our capacity. Clinton is producing coated, heat-treated and spandrel glass along with our Thermopane insulating glass and SunPanel™ solar collectors.

Working and growing in North Carolina. Nothing’s finer!
